

PACIFIC INDUSTRIAL SCALE CO. LTD.

DUMPER SCALES

Pacific Dumper Scales are uniquely designed to fit on standard dumpers with minimal modifications. Now the trucks can be weighed, dumped and tared all in one cycle, saving time and money without sacrificing accuracy.

Our fully equipped fabrication shop and professional engineering department are able to custom design and manufacture to suit your weighing needs.

These scales are built to withstand heavy industrial usage while providing exceptional accuracy and reliability with low maintenance. The Pacific Dumper Scale utilizes a special self-centering load mounting assembly to protect the load cell from undue stress. The weighbridges are constructed with high strength structural steel and checkerplate steel decking to give optimum strength with minimum weight.

Dumper scales available for weighing:

- Containers
- Trucks
- Railroad Car/Truck Combinations
- Custom Designs

Chip Dumper Truck Scale

Railroad Car/Truck Dumper Scale
