PACWEIGH RWA SCALE SOFTWARE MODULE

SOFTWARE DESIGNED FOR THE
RECYCLING, WASTE & AGGREGATE INDUSTRIES

Interfaces with PAC-WEIGH Office Module or other office programs such as Cougar Mountain and Dexter Chaney.

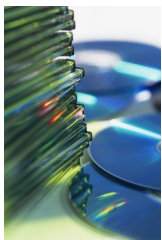

www.pacific-scale.com

PACWEIGH RWA SCALE SOFTWARE MODULE

The **PACWEIGH RWA Scale Module** is a software package that communicates with up to two electronic scales per workstation. This software package is designed to produce weigh scale tickets, process payments and record data for analysis and billing. While most of our customers use this module to generate weigh tickets, this system is able to produce tickets for non-weighed transactions as well.

The Scale Module can be configured to work with these modules:

- PACWEIGH Office Module (Invoicing Module)
- DVR/Security Camera Integration
- PACWEIGH U-Scale, Unattended Operation Module (Trucker Operated)

Share data in real time... or export data daily, weekly, or monthly...

The Scale Module can share data in real time with the **PACWEIGH RWA Office Module**, or export data in daily, weekly, or monthly batches. The Scale Module can be interfaced to billing and costing systems from other vendors such as

Cougar Mountain and Dexter-Chaney. The software has extensive reporting capabilities and can function effectively as a stand-alone module.

Excellent security and audit trail

The system features a very strong **security** and **audit trail**. Features of the audit trail include:

- Unique sequential ticket number.
- Tickets can be voided but not deleted.
- Edited and voided tickets are written to a special audit table.
- The Audit file contains copies of the original ticket data.

Upgrade and support packages are available for this system.

Features of the Scale Module

- Ability to read weight from one or two scales
- Interfaces to any manufacturer's scales indicators
- Can produce non-scaled transactions
- Produce printed tickets and load advice for transactions.

- Select to print tickets for some or all types of transactions
- Cash reconciliation report—tracks debit cards, credit cards, cash, coupons and cheques.
- Export data to the PACWEIGH Office System, Excel and several other office systems including Cougar Mountain and Dexter Chaney
- Includes standard reports as well as a built-in report writer to create and save your own reports.
- Can track an unlimited number of customers and materials.
- Allows you to turn on tracking for data fields such as Trucking Company, Source, Zone, Cell, Job, Purchase Order, Release Number.
- Allows for tracking incoming and outgoing materials
- Pricing system is flexible and, allows for multiple prices for the same material depending on customer, job, source or destination of material, purchase agreement and so on
- Supports up to 4 levels of taxes and surcharges
- Taxes can be layered (that is taxes can be taxable), and can be based on weight or value
- Excellent security and audit trail.
