BUILT-IN TRUCK SCALES

CANADIAN WEIGHTS & MEASURES APPROVED

NTEP USA APPROVED

PACIFIC BUILT-IN TRUCK SCALES

- Low maintenance
- Full load cell electronic weighbridge design
- Concrete, checkerplate steel or wood deck surfaces
- Pitless low profile, shallow pattern or pit designs
- Lengths from 20' to 150'
- Widths from 8' to 25'
- Capacities from 20 tonne to 500 tonne
- Custom sizes and capacities available

Shallow Pattern Truck Scales are designed so that the main "I" beams of the weighbridge serve as bull rails to keep trucks on the platform. The load cells are accessed from the side of the weighbridge.

Pit Truck Scales are manufactured for areas where space is at a premium or if there is not enough room for straight approaches. They are available in deep or shallow pit designs. Access to the deep pit is through manhole covers located on top of the deck. The shallow pit scale has cover plates on the platform to access the load cells from the top of the weighbridge.

RoadHugger Truck Scales are built with no side rails and low to the ground. The load cells and mounts are accessed through manhole covers on the top of the platform. This design can be installed in a shallow pit or pitless.

Continuing to offer quality products and exceptional service is Pacific's commitment to new and established customers.
